

**St. Christopher's School Curriculum-Technology Survey--March, 2009**

The following is a brief survey to help us evaluate how you currently use technology in your teaching. The goal of this survey is to help us provide effective professional development for you and your fellow teachers.

The survey is divided into 6 sections: Professional Development, Hardware, Communications, Applications, Research, and Instruction/Evaluation, plus a Demographics section at the end. Please choose your answers from the given list of responses. Each category provides space for open-ended responses as well. Please use those spaces to indicate anything the survey might not have touched on, particular concepts which might be most appropriate within your discipline or grade level, and to provide any additional comments.

This survey explores both the breadth and depth of our technology use at St. Chris, so there will likely be items listed of which you have no knowledge and which may not be of current use to you in your classroom. This is to be expected. The purpose of the survey is to gain a picture of our present
